**It's time to  
go universal.**

# Meet the universal series: Simplifying restorations from inventory to outcomes.

As a dentist, you are asked to do it all. You should have products that can do it all too—anterior and posterior, direct and indirect, self-cure and light cure<sup>1</sup>, all classes, and all etching techniques.

3M is proud to offer a collection of universal products to simplify your day. These are all you need to perform virtually any restoration—so you can save time, reduce inventory, and streamline procedures with the confidence that comes from using world-class materials.

---

**3M™ RelyX™ Universal Resin Cement** works both as a standalone, self-adhesive cement and as an adhesive cement when combined with 3M™ Scotchbond™ Universal Plus Adhesive.

---

**3M™ Scotchbond™ Universal Plus Adhesive** a true one-bottle system<sup>2</sup> with gold standard bond strength, suitable for all direct and indirect indications, all etching techniques, and all dental substrates. It also serves as a universal primer for all restoration materials.

---

**3M™ Filtek™ Universal Restoratives** simplify your single-shade restorations while providing natural-looking esthetics with top-of-the-line polish retention and wear resistance.

1. Scotchbond Universal Plus Adhesive is dual cure compatible; Filtek composites are light cure only.  
2. No separate primer, silane, or dual-cure activator required.

# Goodbye complexity. Introducing a truly universal resin cement.

**3M™ RelyX™ Universal Resin Cement** works both as a standalone, self-adhesive cement and as an adhesive cement when combined with 3M™ Scotchbond™ Universal Plus Adhesive.

Together they eliminate the hassle and confusion of multiple resin cements, primers and adhesives, simplifying your direct and indirect restorative workflows. With fewer products to stock and replenish, you save space, time and money.

The Micro Mixing Tip is removed right after use enabling hygienic storage without a used mixing tip. The syringe is cleanly sealed by a unique valve mechanism.

The Micro Mixing Tip provides excellent mixing quality.

- Virtually all indirect indications with self-adhesive mode or as a two-component system with Scotchbond Universal Plus adhesive.
- Outstanding self-adhesion for maximum efficiency
- Game-changing automix syringe with 80% less cement waste<sup>3</sup>
- Virtually no post-operative sensitivity<sup>4</sup>
- Easy excess clean-up

<sup>3</sup>. Per application compared to currently available standard automix systems.

<sup>4</sup>. Source: Field Evaluation EU/USA conducted by 3M.

# The original universal adhesive... Now better than ever!

- First radiopaque universal adhesive
- Bonds and seals caries-affected dentin
- Gold standard adhesion to all dental substrates, including glass ceramics
- Universally suitable for all direct and indirect indications and all etching techniques
- Full dual- and self-cure compatibility without a separate dual cure activator
- Virtually no post-operative sensitivity

Nearly a decade ago, 3M introduced the first truly universal dental adhesive. Now **3M™ Scotchbond™ Universal Plus Adhesive** takes universal adhesives to the next level with new features like radiopacity for even greater control and predictability.

To simplify your workflow, Scotchbond Universal Plus Adhesive is suitable for all direct and indirect bonding indications and all etching techniques. It provides gold standard adhesion to all dental substrates, including glass ceramic. It is also a true one-bottle system—no separate primer or silane required—and it offers full dual- and self-cure compatibility without a separate dual cure activator.

Also available in a unit dose for efficient hygiene management — reduces the risk of cross-contamination.

# Universal restoratives for every patient.

3M™ Filtek™ Universal Restoratives can offer versatility and simplicity for every class of restoration. They feature esthetics and high polish retention for beautiful anterior restorations, while 3M's TRUE nanotechnology provides high strength and excellent wear resistance in posterior restorations.

## 3M™ Filtek™ Supreme Ultra Universal Restorative

- Full palette of 36 shades and 4 opacities to match any patient's dentition
- Body shades enable a simple, single-shade technique
- Exceptional handling
- Wear resistance similar to enamel<sup>5</sup>
- Can be safely warmed<sup>6</sup> and injection molded

5. 3M Internal Data.

6. Warm capsules to 70°C (158°F) for up to 1 hour.

Pink Opaquer to easily mask metal and stained dentition

## 3M™ Filtek™ Universal Restorative

- Simplified shade selection—just 8 designer shades to cover most patients' esthetic needs
- Universal opacity that blends naturally
- Extra White (XW) shade for patients who bleach
- Pink Opaquer to easily mask metal and stained dentition
- Can be safely warmed<sup>6</sup> and injection molded

# Ordering Information
